DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on 02/15/2007 is acknowledged and has been entered into the records. The applicant has amended claim 3 in response to the previous office action. The Examiner has accepted applicant's amendment. Claims 1-5 are currently pending in the application. However, after a careful review, it has been determined that claim 5 has certain defect, which is the subject of this office action.

Claim Rejections - 35 USC § 112

2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 5, the recitation of "other methods" (see line 3) has created certain ambiguity as to what "other methods" are being referred to. Other methods could be interpreted as any number of things without any limit. This limitation has made the claim vague and indefinite. Appropriate correction is required.

Allowable Subject Matter

3. Claim 1 would be allowable because the prior art of record, taken alone or in combination, fails to disclose or render obvious an apparatus for 3-D shape measurement comprising a line laser projector with markers and an image capturing device for capturing for capturing the laser projecting device and a target object, in combination with the rest of the limitations of claim 1.
4. Claims 2-4 are allowable because they are dependent claims.
5. Claim 5 would be allowable if amended to overcome the 35 U.S.C. 112 rejections above.
